

# Get ahead of the crowds with JACE Training

## Start your Foundation Learning with JACE Training and progress towards a career in Childcare.

Foundation Learning is a programme designed to allow you to add to your school grades and make your own choices of which subjects to study. Once you are set up on the JACE Foundation Learning programme you can begin your introduction into the Childcare qualification by starting with the Entry Level Award in Caring for Children. This course provides an Introduction to the skills and knowledge need to care for children.

### The Next Step

This would be a progression onto the Level 1 Certificate in Caring for Children (QCF).

This will provide an opportunity to develop personal and work life skills that will support your pathway into employment.

### *Types of Job Roles and Working*

#### *Environments:*

Working with children in a nursery, crèche, pre-school, children's centre, Sure Start Centres, hospital, primary care and community based service, nanny or Childminder.

Through an Apprenticeship you would work in a support role within a nursery and work through the different Childcare Levels. This could lead you on to a Supervisory or Nursery Manager job position.

# Get ahead of the crowds with JACE Training

*Foundation Learning is a great route if you didn't get English & Maths at grade A-C or you want to improve your basic qualifications.*
